Coding&Solution

Date	01 October2026
Team ID	SWTID-2026-3953
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	Marks 5

Coding&Solution

This section evaluates the quality and completeness of your implemented Client Script and UI Policy and the overall solution. Your submission should demonstrate working functionality, clean configuration practices, and alignment with the defined Incident Management requirements.

:Instructions

1.Ensure the Client Script and UI Policy are properly configured and follow ServiceNow best practices.

2. The solution should address the core Incident form requirements and implement the key functional requirements.

3. Include all Client Script, UI Policy, UI Policy Action, and configuration details required to reproduce the solution.

4. Attach or link to your configuration documentation or repository, if available.

Solution Summary

Field	Details
Repository Link / URL	Not provided
Programming Language(s)	JavaScript / ServiceNow platform configuration
Framework(s) Used	ServiceNow Incident Management, Client Scripts, UI Policies, Incident Table and Form
Key Features Implemented	•• Client-side validation on Incident form • Dynamic field visibility and mandatory control • UI Policy for controlling Incident fields • Automatic form behavior based on field values • Validation of Incident form data • Improved user experience and data consistency
Pending / Incomplete Features	No additional project features specified
Setup / Run Instructions	Open ServiceNow → Navigate to Incident module → Configure the Client Script → Configure the UI Policy and UI Policy Actions → Open the Incident form → Enter or modify Incident details → Verify dynamic field behavior and validation → Submit the Incident and validate the results.

Code Quality Checklist

S.No	Criteria	Status (Yes (No /
1	Solution components are modular and organized into separate ServiceNow Client Script and UI Policy configurations	Yes
2	Meaningful field, script, UI Policy, and configuration names are used	Yes
3	Configuration and script logic are documented where necessary	Partial
4	Client-side validation and field behavior are handled for critical Incident operations	Yes
5	The Incident form operates without critical errors	Yes
6	Configuration changes are maintained through ServiceNow update/deployment mechanisms	Not provided
